Name: Artem Pelenitsyn

Congratulations! You have successfully completed the free online offering of Automata, offered April through June 2012. To successfully complete this free online class, students were required to watch lectures, complete homeworks and automated exercises, and take a final exam. According to our automated system, your scores on these components were as follows:

Homeworks: 37.0 out of a maximum of 37

Programming Assignments: 20.0 out of a maximum of 20
(optional)

Final Exam: 159.0 out of a maximum of 170

Scaled total¹: 96.8 out of a maximum of 100

We thank you for your interest in studying Automata, and for participating in our ambitious experiment to deliver quality educational content to a worldwide audience.

Jeffrey Ullman

Professor of Computer Science,
Stanford University

¹ The scaled total is computed using 50% of the score on Homeworks and 50% of the score on the Final Exam.

Please note: This online offering of Automata draws on material from our classes at Stanford University but does not reflect the entire curriculum offered to students enrolled in our courses at Stanford. This statement does not confer Stanford credit, grades, a degree or a certification or affirm that you were enrolled as a Stanford student, nor does it verify the identity of the individual who took the course.
